Re: In the Matter of: Danny Corp., Docket No. TSCA-01-2006-0060

Dear Mr. Kosloff:

EPA has the following comments on the Phase III Site Characterization Plan dated November 30, 2012, and submitted by Stantec Consulting Services on behalf of Danny Corp.:

1. Page 11, Sampling Grid. The Plan states: "Sampling will be conducted using the sampling grid that WESTON designed and used for their Phase II ESA." Please provide the Weston sampling grid to Marianne Milette by January 15, 2013.
2. Page 18, Data Gaps. Pursuant to paragraph 29(c) of the Second Amended Consent Agreement, the Phase III Site Characterization Plan is required to include "all" areas of the Site not previously addressed. Omitting "porous and non-porous surfaces including buildings, steel, and other structural building components" is not acceptable, and, if the omission is not corrected, would violate the Consent Agreement. Please amend the Plan to remedy this defect by January 30, 2013.
3. Page 19, Proposed Schedule. The schedule is too long. Please amend the schedule to ensure that all sampling is complete by the end of calendar 2013.

If you would like to discuss these comments, please call me at 617-918-1781, or have Stantec call Marianne Milette at 617-918-1854.

Sincerely,
